

Q: How do I change the resolution of my screen?

A: Right mouse click on your desktop to bring up the menu list as shown below

Click properties – the Display Properties box should appear

In the Display Properties box – click on the **Settings** tab as shown below

Locate the **Screen resolution** section in the bottom portion of the task window and choose the preferred setting by sliding the **arrow** left or right.

(Sliding the arrow to the left will make the icons and active windows larger)

Click OK to apply the new setting to your screen. It may take a few seconds to refresh
